

# THE FUTURE OF FRICTIONLESS RETAIL

## About the Technology

Just Walk Out technology streamlines retail by replacing traditional registers with computer vision, sensor fusion, and deep learning. The system automatically tracks items as they are removed from shelves, enabling a "grab-and-go" experience where customers simply scan to enter and walk out to finish. This innovation maximizes operational efficiency while delivering a seamless, frictionless journey for the shopper.

## HOW IT WORKS: TAP - SHOP - GO

### 1 ACCESS

Enter by tapping a credit card, mobile wallet or app

### 2 EXPERIENCE

Computer Vision & Weight Sensor track Items Automatically

### 3 EXIT

Customers simply walk out. System processes payment and sends digital receipt
